Standard Moil Point - The most popular all-purpose tool. Contractors, Public Utilities, Municipalities and other users depend upon this for their everyday concrete breaking needs. **Standard Narrow Chisel -** Used for the identical purpose as the Moil Point, but with a blade rather than a point, the Standard Narrow Chisel is preferred by many. **Standard 3" Chisel-** One of the most versatile of all tools. Its many uses include cutting asphalt, line cutting or scoring of concrete and breaking of softer concretes and other substances too soft for efficient moil point work. **Hi-Duty -** Available in Moil Point, Narrow Chisel and Chisel, the Hi-Duty tools are made from a beefier round steel and are recommended where a heavier paving breaker hammer is used or resistance to fatigue or prolonged life is desired.
